

Astronights

Evening activities

Welcome and Safety

Join our team as they introduce you to the exciting night ahead of you. Are you ready for your mission to have fun and stay safe?

UV Torches

The Sun is so important to our lives! Find out how the light from the Sun helps us in ways you never imagined. Then, make your very own ultraviolet torch to take home with you, and use it to create and uncover hidden messages.

It Takes Guts

Follow the journey of your food into your mouth, through the acid bath in your stomach, along metre after metre of pulsating guts, and then... out the other end. This show, featuring video footage of people's inside, is a gross-out, squirm-inducing demonstration of why exactly your poo is brown...

Big Bang Bingo

Brains, Mummies, false teeth and more...the Science Museum holds some pretty strange objects in its collection. Come and see some of the weirdest items we look after by playing object bingo. With many prizes to be won along the way!

Astronights

Morning activities

Breakfast

Stoke up for the day with one of our breakfasts. This normally consists of a croissant, fruit muffin, fruit and a juice box.

IMAX

From the moment you gaze up at the giant screen, you'll be transfixed. It's the height of five double-decker buses! All that you need to do is sit back and enjoy.

Wonderlab

Revealing the beauty of the science and maths that shape our everyday lives, Wonderlab: The Statoil gallery will ignite your curiosity, fuel your imagination and inspire you to see the world around you in new and exciting ways.
